Subject: Niagara County EPA Sites-Dan Telvock

Good Morning:

Peter, Mike and I spoke with Dan Telvock yesterday. He followed up with some questions below. We informed him about the lack of funding to continue and we are demobing equipment/trailers. He knows that I am personally leaving on Monday. Dan wanted to do an in-person on camera interview since he feels it is news worthy. However, he seemed to indicate he needed authorization from someone who is out of the office. Mike will also need to run this type of interview/broadcast past EPA Public Affairs management. What I am suggesting to you both is that if and when this is requested by Dan and EPA Public Affairs briefs us/gives the green light, you both conduct the interview. Peter can represent the sites and speak as the OSC. It would make logistical sense and also introduce Peter as the Buffalo/Niagara Area OSC. Please let me know what you both think.

Importance: High

Hi Dan:

I will have to do some calculations to come up with an estimate for remaining material at NFB. As of today, 4,576 tons of material has been removed and shipped from NFB Site.

As far as Holy Trinity Cemetery, we have to work on that info in order to finalize

the HTC action memo (the amount of material to remove, the time it will take, the cost of disposal as well as the overall estimated cost of the project). I won't have those estimates anytime soon since we are focusing on the demobilization right now.

I will provide that information when we have it.

Subject: couple questions

Eric

In your estimate, how much radioactive material is left to remove at the Niagara Falls Blvd site?
In tons, if possible?

In addition, how much did you anticipate having to remove at Holy Trinity and what was estimated cost?

Thanks

Dan Telvock
